PROJECTS

MNS - Janhit
MNS - Janhit is an android based application that aims to provide the citizens with a platform to redress their complaints or grievances. However, if you face any problem, you can complain about this by using the "MNS Janhit Mobile App". With automated workflow grievance will route through all the stakeholders for immediate redress.

School Mate - WS
School Mate - WS is a tool that is specifically designed to streamline the paperless administration of schools and educational institutions. It consists of various modules which greatly help the teachers, parents, and staff in maintaining student records, academic history, and other essential student information.

WS-GMS
WS-GMS is an android based application that aims to provide the citizens with a platform to redress their complaints or grievances. A citizen can lodge the grievance online via a mobile app from anywhere at any time. The grievance will route through all the stakeholders for immediate redress.

Human Resource Management System
WS-HRMS is a form of HR software that combines several systems and processes to ensure the easy management of a business, employees, and data. Human Resource management system software is used by businesses to combine a number of necessary HR functions.
